At Asterisk, we're always looking to improve. After years of feedback from our professional athletes, we've taken our complete line of knee protection and made it even better. With all-new composite technologies, Asterisk engineers are busy working to make knee protection stronger, lighter and better fitting than our competition. All of Asterisk products are made from high quality materials and every attention to detail.

Carbon Cell Pro

Used buy a lot of the Top Pros in MX, SX, and Off Road.

The newly upgraded Carbon Cell Pro, it has the same frame as the regular Carbon Cell with a few modifications to its fitment.

Anti-Slip Liners

We have added to liners to the strapping system to insure extra comfort and consistency to the strap placement. We have included our upgraded gear guard to help with the feel and protection of the motorcycle and to prevent any tearing of the clothing. We have added wedge pads to the tibial area to ensure proper fitment and fill any gaps for better protection. The New Carbon Cell Pro have our new patented Anti-Rotation Tether which is the only brace on the market to offer this kind of protection. All of these things to help and add to the best fitting, light weight protection on the market.

CARBON FIBER FRAME

- Anatomically correct design
- 12K aerospace carbon fiber Military Spec
- Ultra lightweight impact distributing structure

ASYMMETRI-GLIDE HINGE

- Tracks the natural "rolling-gliding" motion of the knee joint
- Accurate track hole pattern
- Adjustable ext. regulator from 0° to 30°

ANTI-ROTATION TETHER

- Links the brace to the boot, making them as one
- Transfers forces of a lower leg rotation
- Adjustable to suit each individual

STRAPS

- Standard adjustable strapping (4)

TELE-TRI PATELLA CUP

- Three piece design (patented)
- High impact Nylon 6 material
- Full range of motion coverage of the knee cap
- Shock absorbent foam padding

WATER RESISTANT

- Non-corrosive metals
- Non-corrosive composites
- Hand washable soft materials

UNDERSLEEVES COTTON (included with braces)

- Cotton compression sleeves
- Optional upgrade
 - Banded undersleeves
- Optional zero G pants

[NEW TETHER]

Carbon Cell 1

Asterisk Knee Brace Carbon Cell 1 (CC1). Our dedication to making the finest quality, fitting and performing knee braces in the world has led us to the design and development of the CC1. The CC1 is manufactured from Military Spec and Aerospace grade carbon fiber prepreg that is made in America, the finest in the world. Our focus during the design and development of the CC1 was making the slimmest, lightest, most comfortable knee brace in the world. We wanted a brace that fit so well on your leg, it looks like it's painted on, and we hit a home run!

At roughly 1lb or 454g (+/-depending on size) per brace, we believe it's the lightest, best fitting and most comfortable functional knee brace in the world, without sacrificing strength and durability. The CC1 is backed by a 3-year frame warranty. Asterisk is the inventor of the off the shelf carbon fiber performance knee brace, and in the world of knee protection and bracing, this is a game changer.

[NEW TETHER]

Ultra-Cell 4.1

Introducing the hybrid classic! Revised with the success of the 4.0 we have introduced the 4.1. This includes all the features of the 4.0 but eliminating the liners. These liners are still available as an option. This enabled us to reduce the price to \$699.00.

With gear getting smaller and tighter in the knee joint area, the collapsing 3-piece patented patella makes tighter pants easy to maneuver. This brace is also easily repairable in the field with the part available here in our factory in USA. All our braces come with the patented Anti-Rotation Tethers.

A.C.M. FRAME

- Anatomically correct design
- Carbon fiber urethane matrix
- Rigid & lightweight, impact distributing structure

ASYMMETRI-GLIDE HINGE

- Tracks the natural "rolling-gliding" motion of the knee joint
- Asymmetrical design allows each hinge to set properly
- Allows for automatic tibia alignment of lower frame
- Adjustable ext. regulator from 0° to 30°
- Condyle shims for fine tuning fit

A.R.C. CUFF

- Adjustable Retention Control
- Multiform rigid lateral support
- Built-in Anti-Rotation connection

ANTI-ROTATION TETHER (patented)

- Links the brace to the boot, making them as one
- Transfers forces of a lower leg rotation
- Adjustable to suit each individual

TELE-TRI PATELLA CUP (patented)

- Three piece design
- Easily removable
- High impact Nylon 6 material
- Full range of motion coverage of the knee cap

WATER RESISTANT

- Non-corrosive metals
- Non-corrosive composites
- Hand washable soft materials

UNDERSLEEVES COTTON (included with braces)

- Cotton compression sleeves

In 2019, we introduced the Micro Cell. The Micro Cell is designed specifically for the younger rider, approximately 5-10 years old, depending on size and weight. This is also the first of our "Slim Line" of carbon knee braces.

The Micro Cell has an epoxy prepreg carbon frame, made in our factory in Corona, California, with a full coverage patella cup and hyper extension stops ranging from 0-30 degrees (similar to our current Jr Cell) and Carbon Cell Braces. It is also equipped with our true motion hinge. This brace offers rigid lateral arms for the best support and lowest profile. The Micro Cell assures all the important areas of knee protection are addressed which most other braces do not offer. (Option thickness available on request)
