CLAMP-ON

GRIP SYSTEM

ABOUT

Using the latest in grip technology and molding techniques, ProTaper's Clamp-On Grip System offers the comfort and control of traditional grips with the added advantage of quick, effortless installation. The design eliminates the need for glue and safety wire, yet ensures durable, slip-free performance.

Our super-slim clutch side *Windowed Core* not only minimizes the outer grip diameter, but also delivers critical relief areas for the palm and fingertips. The result is increased impact and vibration damping over competing solid-core designs, leading to significantly improved rider comfort and control.

The grip surface utilizes an extra-supple, tacky compound that is seamlessly molded to the inner core. This provides maximum comfort and traction and alleviates blistering. A firmer compound is used in the flange and endcap areas to resist crash damage and reduce wear.

FEATURES

- *Easy on, easy off*—no messy glue or safety wire needed
- *Dual Compound Technology* for comfort and durability
- *Exclusive clutch-side Windowed Core* eliminates harsh feel of competing solid core designs
- *Includes 7 interchangeable throttle cams* for most full-size 2- and 4-stroke motocross models
- *Slim outer grip diameter* to alleviate arm pump
- *Low-profile CNC machined aluminum clamp*
- *Three traction patterns to choose from: Half Waffle, Pillow Top, and Full Diamond*

SELF-ENGAGED LAUNCH ASSIST (SELA)

NEW! AVAILABLE SPRING 2020

ABOUT

Our revolutionary Self-Engaged Launch Assist (SELA) solves a problem faced by all motocross racers, no matter their skill level: setting a start device alone is awkward at best and impossible at worst. With its patent-pending self-engaged twist dial, SELA can be easily set without any assistance, giving riders the freedom to practice starts and line up for races by themselves.

During a start, SELA makes it possible to temporarily compress the motorcycle's front suspension, reducing its tendency to wheelie under acceleration. This optimizes rear wheel traction, allowing the rider to be more aggressive with the throttle and launch down the start straight with greater control.

The unique, modular design allows SELA to be installed on any full-size, late-model motocross bike. A dual-hinged receiver ring makes for quick and convenient installation without removing the front wheel or fork.

FEATURES

- Patent-pending self-engaged twist dial enables easy, unassisted operation
- Dual-hinged receiver ring with variable clamping diameter for quick installation and precise fit
- Forged aluminum alloy construction optimizes weight savings, strength, and durability
- Hard-anodized moving parts maximize resistance to corrosion and wear
- Durable laser-etched graphics, including engagement confirmation markings
- Includes all parts and hardware necessary for a wide range of applications
- Detailed installation instructions and templates available online at protaper.com/sela

INCLUDED COMPONENTS

1. Patent-pending self-engaged twist-dial assembly
2. Dual-hinged receiver ring with variable clamping diameter
3. Receiver A (Honda, Husqvarna, Kawasaki, KTM, Yamaha)
4. Receiver B (Suzuki)
5. Model-specific receiver spacers
6. Thread-locking fluid
7. Installation and assembly tools
8. Model-specific assembly screws
9. Aluminum drill guide (not pictured)

STARTING, SIMPLIFIED.

With its patent-pending self-engaged twist dial, SELA is the first and only start device that you can easily set by yourself. Forget about flagging someone down at the line and struggling with a button. Be a self-starter with SELA.
